PROFESSIONAL SUMMARY

Full-Stack Developer who builds high-performance web applications that people enjoy using, specializing in **React**, **Node.js** and **cloud infrastructure** and bridging the gap between elegant user interfaces and robust backend systems. Has shipped products that solve practical business problems: point-of-sale and record keeping, customer request and product-demand tracking, and a photography booking platform with M-Pesa payments for the Kenyan market. Believes software should be fast, accessible and maintainable by the next engineer who touches it, and values code review, system design and mentoring. Currently pursuing a degree in Statistics at Jomo Kenyatta University. Open to full-stack roles, contract work and collaborations.

TECHNICAL SKILLS

Core Technologies	React, Node.js, Tailwind CSS, cloud infrastructure
Application Domains	Web applications, point-of-sale systems, booking platforms, product and customer-request management, M-Pesa payment integration
Engineering Practices	System design, code review, technical leadership, mentoring, maintainable and accessible code
Academic Foundation	Statistics (in progress)

PROFESSIONAL EXPERIENCE

Full-Stack Developer

Mar 2025 – Present

Lens Kenya

- Built **Lens Kenya**, a platform that streamlines day-to-day operations across photography businesses in Kenya.
- Worked as part of a team of 3 engineers to deliver the platform.
- Implemented the client journey end to end: booking sessions for graduations, weddings and portraits, viewing photo galleries, and paying through **M-Pesa**.

SELECTED PROJECTS

LensKenya – Photography Booking Platform Web · Featured

- Booking platform for the Kenyan market where clients reserve sessions for graduations, weddings and portraits, browse galleries and pay with M-Pesa.

Point-of-Sale (P.O.S.) System Web

- Business-management POS that helps entrepreneurs run their business and keep accurate records efficiently.
- Designed to handle a large number of customers without requiring much manual labour.

Loopline Product Management Platform Web

- Platform that lets entrepreneurs manage customer requests and see which products are in highest demand.

Additional projects: School Management System (Web, featured) · JKUAT Marketplace (Web, featured)

EDUCATION

Statistics (Degree in progress)

2025 – 2029 (expected)

Jomo Kenyatta University

- Currently in second year of study.

PROFESSIONAL STRENGTHS

Technical leadership · **System design** · **Code review** · **Mentoring**
